The Directory of Hospitals

A national network of selected hospitals

As an AXA PPP healthcare member, you have access to a national network of hospitals, day-patient units, scanning centres and other private healthcare facilities. These have been selected following a comprehensive assessment of their quality, value and range of services.

All of them are listed in our Directory of Hospitals.

Oral surgery OS

If you need oral surgery, then we'll provide benefit for those oral surgical procedures that are set out in your membership handbook, when your dentist refers you directly to a facility indicated by the OS symbol in our Directory of Hospitals. Please contact our team of Personal Advisers before you have any treatment.

Cataract Surgery CS

If you need an eye operation involving cataract surgery, then we'll provide benefit when your general practitioner refers you directly to one of the facilities indicated by the CS symbol in our Directory of Hospitals. Please contact our team of Personal Advisers before you have any treatment.

Our quality assessment and improvement programme

Our initial assessment covers most aspects of the hospital's services. We only select hospitals and other facilities for inclusion in our network if they meet and continue to meet our strict quality criteria. In turn, we're committed to supporting the hospitals included in our network, encouraging them to invest in new facilities and services - to our mutual long-term benefit.

We regularly monitor their performance to assess their quality of care, which is why your feedback is particularly important.

If you need to use a facility, please complete your hospital's 'patient satisfaction survey' form and return it to them.

Standards for specialised services

We also work closely with network hospitals that provide certain specialised care services such as cancer, cardiac revascularisation, critical care, paediatrics and psychiatric care. National guidelines for these have been established in conjunction with appropriate professional authorities and organisations.

The benefits of our network hospitals

The hospitals included in our Directory of Hospitals will endeavour to make your stay as pleasant and comfortable as possible. You can usually have your own private room with en-suite bathroom, television and telephone. You'll be given a choice of dishes for each course at mealtimes and your visitors may, within reason, come and go as they wish.

Be sure to call us first

To check whether you're covered, please call us before you start treatment. We'll then be able to authorise your claim in advance. There may be rare occasions when we suspend the use of a network hospital or another facility listed in our Directory of Hospitals to protect the interest of our members.

Day-patient treatment

Advances in medical care mean that many operations are now undertaken on a day-patient basis. This is in keeping with good clinical practice. Please note that you may be cared for in an open day ward (rather than a single room) while you recover from an anaesthetic to enable nursing staff to monitor your progress more effectively. Most hospitals now offer day-patient treatment and we have included a number of purpose-built day-patient units in the Directory of Hospitals.

Please check the Directory of Hospitals

The map on page six shows the United Kingdom divided into eleven areas. This is then followed by a list of the hospitals, scanning centres and other facilities with one or more symbols shown against the name of each facility listed. Each entry shows the medical service available, arranged alphabetically by town and ordered in reference to the eleven areas shown on the map. If you have any questions, please call our team of Personal Advisers. For full details of the facilities and the range of services provided by the hospitals, scanning centres and other facilities listed in the Directory of Hospitals (and for information on medical specialists we recognise for benefit) please visit our website: axapphealthcare.co.uk/hospitals or contact our team of Personal Advisers.

Key to symbols

OS Oral surgery arrangement in place

CS Cataract surgery arrangement in place

A triangle (Δ) indicates an NHS hospital that does not have dedicated private patient facilities. (We will recognise an NHS bed nominated as a private bed but in such cases the level of accommodation may be the same as standard NHS accommodation.)

Scanning centres - these centres provide:

M MRI (magnetic resonance imaging)

A diamond (\diamond) indicates that the centre has an open MRI scanner.

C CT (computerised tomography)

P PET (positron emission tomography)

These are usually carried out on an out-patient basis. Only the centres listed can be used for out-patient scanning.

G **General hospitals** - acute medical and surgical hospitals and day-patient units which are recommended by AXA PPP healthcare following our selection process and where you will receive a full refund for hospital treatment.

Ps **Psychiatric hospitals** - hospitals that specialise in the treatment of psychiatric illnesses.

R **Rehabilitation units** - units that provide specialist rehabilitation services.
